Professional Summary

Detail-oriented and efficient Data Encoder with proven experience in managing and inputting data for large-scale projects. Proficient in data validation, database management, and maintaining high accuracy rates. Adept at working under pressure and consistently meeting tight deadlines to ensure streamlined data workflows and optimal operational efficiency.

Work Experience

Data Encoder & Analyst

Business Solutions Corp. | *Caloocan, Metro Manila* | *January 2023 – Present*

- Accurately encoded over 50,000 data entries into the corporate database with a 98% accuracy rate, ensuring strict compliance with organizational standards.
- Conducted comprehensive data analysis using Microsoft Excel to evaluate annual and monthly product sales data.
- Designed and maintained visual reports—including line, bar, and pie charts within Excel—to clearly illustrate sales trends and identify which products contributed the largest share of revenue.
- Processed over 500 records daily, improving overall workflow efficiency by 30% through improved data-handling procedures.

Data Entry Clerk

Tech Innovations Ltd. | *Manila, Philippines* | *March 2020 – December 2022*

- Operated CRM systems and MS Office applications to manage sales invoices, purchase orders, and inventory records.
- Verified data against source documents and performed routine self-audits to detect and resolve errors before final delivery.
- Assisted in sorting, scanning, and labeling physical documents, seamlessly transitioning paper records into digital database formats.
- Trained and mentored new encoders on proper data-entry protocols and system updates.

Education

Bachelor of Science in Information Technology

University of Caloocan City | *Graduated: May 2019*
