PROFILE

Motivated and dedicated Information Technology student with a foundation in web development and database management. Knowledgeable in React.js, JavaScript, HTML, CSS, and MySQL, with experience developing academic and personal projects. Eager to continuously learn new technologies, strengthen problem-solving skills, and contribute to a team while gaining hands-on experience in software development.

WORK EXPERIENCE

Web Developer (Academic Project)
January 2026 – April 2026
Developed a web-based Hiring Management System as part of a university project.
Built responsive user interfaces using React.js, HTML, CSS, and JavaScript.
Designed and managed a MySQL database for storing applicant and job information.
Collaborated with team members to implement system features and troubleshoot issues.
Used Git for version control and project collaboration.
